

Scalability & Future Plan

Date	12 JULY 2026
Team ID	N/A - Individual Submission
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	SQLite local database	Best for demo, not multi-user production scale.	High
2	Rule-based AI logic	Transparent but less adaptive than trained models or LLM integrations	Medium
3	No public hosted deployment	Evaluator must run locally or through Docker.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Single/local demo use	Deploy backend behind a production server and load balancer
2	Data Storage	SQLite file	Move to PostgreSQL with migrations and backups.
3	Performance	Synchronous lightweight APIs	Add caching, background jobs and formal load tests
4	Security	JWT and password hashing	Add HTTPS, secrets manager, audit logs and role-based access

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Charts, PDF exports and scenario comparison	1-2 months	Improves user understanding and documentation.
Phase 3	PostgreSQL migration, hosted deployment and automated tests	2-3 months	Supports reliable multi-user use.
Phase 4	Optional LLM integration, creditor templates and compliance review	3-6 months	Improves personalization and readiness for real-world use
